Deuto-Dip® Yellow represents excellence in udder care.

Deuto-Dip® Yellow
Teat Dip
Deuto-Dip® Yellow
HOW IT WORKS

Deuto-Dip® Yellow completely covers the teat to reduce bacterial infection of the teat canal. At the same time, Deuto-Dip® Yellow protects and maintains healthy skin. Its yellow color makes it easy to visually inspect. Deuto-Dip® Yellow features a high factor sun protection and repels flies. Its non-drip adhesion allows for economical use.

Deuto-Dip® Yellow reduces veterinary expenses, time and energy dealing with udder diseases. It supports high quality milk production, without leaving residues. The use of Deuto-Dip® Yellow ensures healthy and elastic skin, which makes the teat easy to clean and milk.

ADVANTAGES

- REDUCES BACTERIAL INFECTIONS OF THE TEAT CANAL
- PROTECTS AND CARES FOR TEAT SKIN
- HEALTHY AND ELASTIC TEAT SKIN
- NO RESIDUES IN MILK
- SAFE FOR ANIMALS AND FARMER

Deuto-Dip® Yellow
USE

Deuto-Dip® Yellow is applied to the teat after milking using a dip cup. Care has to be taken to wet the tip of the teat completely.

Deuto-Dip® Yellow is a ready-to-use teat dip disinfectant for manual application. It keeps teats healthy and consists of lactic acid, glycerine, lanolin, allantoin, and food colouring. It is shipped in 10 litre or 20 litre containers, or in a 200 litre barrel.

*Use 9 lactic acid carefully. Always read the label and the product information carefully before use. 
Banier-Nr.: N-35516 (IT-0)
OUR ANIMAL HYGIENE PRODUCTS WILL MAKE A DIFFERENCE IN YOUR SHEDS

Deuto-Cal®
A natural product of calcium compounds and anti-slip minerals used as a dry foot bath

Deuto-Mix®
A general use bedding powder for sheds

Deuto-Speed® Green
Liquid foot bath for cattle, sheep and goats

Our animal hygiene products do not leave any residues, which could interfere with anaerobic digestion, making them suitable for biogas plants.
