HOOF HEALTH
Deuto-Cal® represents excellence in natural hoof care.

Deuto-Cal®
Dry Foot Bath
Deuto-Cal® is a dry foot bath for hooved animals consisting of calcium compounds and minerals. It is delivered in 1,000 kg bags or 25 kg sacks.

**Deuto-Cal® HOW IT WORKS**

Deuto-Cal® dries and hardens the hooves. By raising the pH-value and removing humidity from the hoof, Deuto-Cal® prevents severe infection and inflammation of the hoof, such as foot-rot, Mortellaro, and Panaritium (Whitlow). The anti-slip quality of Deuto-Cal® significantly lowers the risk of injury to animals going through the foot bath.

Deuto-Cal® saves time and money spent on animals suffering from foot infections and disease. Healthy livestock, without infection feeds better and has higher milk and meat yields.

**Deuto-Cal® ADVANTAGES**

**Deuto-Cal® USE**

Animals should walk though a trough of Deuto-Cal® twice a day, for example after milking. The dry anti-slip mixture should be 10 – 15 cm deep. Deuto-Cal® is also highly recommended for dry cattle and young animals. Care must be taken to completely empty and refill the troughs with Deuto-Cal® every six weeks. Any excrement should be removed from the bath every day and rubber mats need to be placed 3 – 5 meters immediately after the troughs.

---

*Use biodegradable safety.
Always read the label and the product information carefully before use.

Graub No. Nr. 35595
OUR ANIMAL HYGIENE PRODUCTS WILL MAKE A DIFFERENCE IN YOUR SHEDS

Deuto-Mix®
A general use bedding powder for sheds

Deuto-Speed® Green
Liquid foot bath for cattle, sheep and goats

Deuto-Dip® Yellow
A ready-to-use dip for manually disinfecting teats and keeping them healthy

Our animal hygiene products do not leave any residues, which could interfere with anaerobic digestion, making them suitable for biogas plants.
